Proud to Be an
American Manufacturer

AP Emissions Technologies is a
Clean and Energy Focused Manufacturer

The PERFECT MATCH

Oxygen Sensors & Catalytic Converters

AP O² Sensors and Catalytic Converters are *the perfect match* because they work in harmony to optimize a vehicle's emissions and fuel efficiency. Together, they ensure cleaner exhaust and improved performance, supporting a healthier environment and enhancing vehicle longevity.

Quality. Fit.
Performance.

NEW MUFFLER CHARTS

Purpose:

The new chart pages are designed to make it easier to find a muffler based on its dimensions.

Structure: The section is divided into three parts:

1. **Enforcer II Mufflers** (pages 18-19)
2. **Xlerator Big Max Turbo Mufflers** (pages 20-21)
3. **MSL MAXIMUM Most Popular Universal Mufflers** (pages 22-25)

**Click to
Jump to Page**

How to Use the Charts (Step-by-Step):

1. **Determine Muffler Type:**
 - a. First, identify which of the three (3) muffler types you need.
 - i. **Enforcer II**,
 - ii. **Big Max Turbo**, or
 - iii. **MSL**.
2. **Determine Cross-Section:** The charts are organized by:
 - a. **Shape and Size**, starting with
 - **Round** mufflers, and then moving to
 - **Oval** mufflers
 - from smallest to biggest.
3. **Determine Neck Configuration:** Next, find the required Neck Configuration (e.g., Offset/Center, Offset/Offset).
4. **Sort by Neck Size and Length:** Within each group, the parts are sorted first by:
 - a. **Neck Size** - from smallest to biggest, and then by
 - b. **Length** - from smallest to biggest.

Additional Notes:

- **Side Inlet Mufflers:** For MSL MAXIMUM mufflers, those with a side inlet are located at the very end of the section (page 25).
- **End Views:** End views are shown for round mufflers (except for center/center configurations) and for 7" x 9" mufflers.
- **Footnotes:** Important notes about specific parts are provided at the bottom of the page.

UNIVERSAL SPECS by DIMENSION

Sorted first by Cross Section, then Shell Length, then Inlet Diameter.

Structure: This section has four parts:

1. **Enforcer II Mufflers** (pages 27-30)
2. **Xlerator Big Max Turbo Mufflers** (pages 31-32)
3. **Universal MSL MAXIMUM Mufflers** (pages 33-51)
4. **All MSL MAXIMUM Mufflers by Part Number** (pages 52-81)

**Click to
Jump to Page**

How to Use Section 1 - 3 (Step-by-Step):

1. **Determine Muffler Type:**
 - a. First, identify which of the three (3) muffler types you need.
 - i. **Enforcer II,**
 - ii. **Big Max Turbo,** or
 - iii. **MSL .**
2. **Determine Cross-Section:** The charts are organized by:
 - a. **Shape and Size,** starting with
 - **Round** mufflers and then moving to
 - **Oval** mufflers
 - from smallest to biggest.
3. **Sort by Shell Length and Neck Size:** Within each group, the parts are sorted first by:
 - a. **Shell Length** - from smallest to biggest, and then by
 - b. **Neck Size** - from smallest to biggest.

Section 4 is simply sorted by Part Number.

Additional Notes:

- **Side Inlet Mufflers:**
 - Side Inlet MSL MAXIMUM Mufflers: find on page 48 in Section 3
 - Universal MSL MAXIMUM Mufflers: find on page 80-81 in Section 4
 - All MSL MAXIMUM Mufflers by Part Number.
- **End Views:** End views exist for Round mufflers and for some Ovals that have a lateral offset (below center line of the muffler).
- **Footnotes:** Important notes about specific parts are at the bottom of the page.

 For 126105 use **X6105** 2 1/2"

GLASSPACKS

- Aluminized Heavy Duty, 15 Gauge, 3", 3½" and 4" Diameter Shells
- Spiral Louvered Inner Core Produces a Deep, Mellow Tone, Decreases Backpressure and Increases Performance
- AKDDQ Necks Allow For Easy Expansion
- Single Packs

PART NUMBER DEFINITION

Example: 351811

First two digits = Shell Diameter (35=3.5=3½)

Second two digits = Shell Length (18")

Third Two Digits = Configuration:

00 = Blank

11 = Center/Center

12 = Mild Offset/Mild Offset

22 = Full Offset/Full Offset

Seventh digit indicates neck size greater than 2¼":

3 = Two 2½" Necks

4 = Two 3" Necks

Seventh or Eighth digit:

2 = 2¼" Core Size

5 = 2½" Core Size

6 = 3" Core Size

X - Pipes

- Mandrel Bent
- Aluminized Steel
- Available in 3 Sizes

Universal X-Flow pipes increase horsepower and reduce noise levels. They work like an H-pipe balance tube, but give your vehicle better performance by increasing exhaust scavenging and balancing the exhaust pulses.

- Max Fit consists of Universal, Direct Fits, and Dual Conversion Pipes.
- Max Fit Universal Pre-bent Pipe is designed especially for the professional installer who has a pipe bender. With Max Fit Pipes, all of the tough bends have already been made. Just turn the outlet end down to either side, or cut it off — depending on the application. Job times are cut in half, the fit is always perfect and there is never any wasted material.
- Save time, space and money with the Max Fit line.
- All Max Fit pipes are 100% aluminized and produced using heavy 14-16 gauge O.D. steel, and re-aluminized weld seams to prevent corrosion.
- Premium Mandrel—bent pipe options maximize gas flow and product life.
- Selected Mandrel pipes are also available in 409 stainless steel.

ELBOWS

WELDING OF ALUMINIZED MATERIAL

Gas Welding

1. Adjust gases until there is a small soft blue flame extending beyond the inner cone $\frac{1}{8}$ " to $\frac{1}{4}$ ".
2. Use an AWS (American Welding Society) Number ER 70S-2 welding rod or the equivalent. This rod has extra elements added to cause the aluminized coating to float on top of the molten puddle away from the inner weld structure.

Tig Welding

Use the same type welding rod as gas welding with argon purge gas.

Mig Welding

For typical exhaust components, use a copper clad, .035 inch to .045 inch diameter wire. Specifically use a low carbon steel wire, AWS Number 70S-3 or the equivalent.

FLEXIBLE TUBING

PROCEDURE FOR CUTTING FLEXIBLE TUBING

NOTE: Flexible tubing coils are in a contracted state. Before cutting, anchor one end and pull and/or snap the coil to bring it back to its proper length.

HACKSAW: (For less frequent cutting)

WIDTH: $\frac{1}{2}$ " or $\frac{3}{4}$ "

TEETH: A no set blade is preferred, although it is usually hard to find locally - 14 tooth or finer.

BANDSAW: (For less frequent cutting)

WIDTH: $\frac{1}{2}$ " or $\frac{3}{4}$ "

TEETH: A no set blade - 14 tooth, run at 350 feet per minute.

A bi-metal blade gives more cuts per dollar than an ordinary carbon steel blade.

Lenox seems to be the best blade for our applications.
